

YOUR PARTNER WORLDWIDE

VALVA series

Portable machines for grinding and lapping of sealing faces in valves, valve disks, flanges etc.

**DN 8 – 1600 mm
(3/8"-64")**

VALVA machines prove their strength everywhere where fast valve repair and economy are required.

Employing tomorrow's technology to machine today's valves

EFCO – VALVA: An impressive Concept

- Wide-ranging use in conventional power stations, nuclear power stations, refurbishment companies, refineries, chemical plants, shipyards, sugar mills, paper mills, on ships, by valve manufacturers and many others.
- Long life due to the use of:
 - High-quality materials
 - Powerful drives
 - Wear-resistant tools
 - Stable light-weight design
- Good price/performance ratio
- High profitability
- Simple handling due to low weight
- Free-hand operation of the “small” machines
- One-man operation
- The live-spindle of the drives has a spring mounting. This facilitates a more controlled tool pressure to the sealing face.
- Universal installation systems enable:
 - Safe installation
 - Stable mounting
 - Fast alignment
- Drives can be supplied depending on requirements.
 - Electric drive 230/120 V, 50/60Hz
 - Rechargeable battery (Valva-S1)
 - Pneumatic drive

VALVA-S1

VALVA battery powered
